

Course title	Sustainable cities						ECTS code	14.03.5372				
							ECTS credits	5				
							max. students	20				
Name of unit administrating study	OTHER	Field of study	Economics/MSG**	Field of specialisation	NONE;							
Teaching staff	Marcin Wołek, Associate Professor ; Jacek Zaucha, Professor ; Jarosław Kempa, Ph.D.											
Number of hours												
Lectures	0	Classes	0	Tutorials	30	Laboratory	0	Seminars	0	Language classes	0	
Forma aktywności						Year&Type of studies*		3 SS1, 1 SS2, 2 SS2,				
Hours with the participation of the academic teacher (including office hours, exams, others):				38		Semester:		6, 2, 4,				
Hours without the participation of the academic teacher (student's self-study, homeworks):				13		Type of course:		optional				
Total number of hours:				51		Language of instruction:		English				
Teaching form	in-class learning											
Teaching methods	Lectures including multimodal presentations, Discussion, questioning, Individual projects, Collaborating, group activities, Case studies, Visiting Pomeranian Science and Technology Park in Gdynia (case study for transformation of urban functions)											
Prerequisites (required courses and introductory requirements)												
Required courses	Macroeconomics, microeconomics.											
Introductory requirements	Basic knowledge in macro and microeconomics, socio-economic geography											
Assessment method, forms and criteria												
Assessment method	Course completion (graded)											
Assessment criteria	Final presentation evaluated as following: 91 - 100 pts - 5 (A) 81-90 pts - 4,5 (B+) 71-80 pts - 4 (B) 61-70 pts - 3,5 (C+) 51-60 pts - 3 (C).											
Course objectives												
To introduce the student to the concept of sustainable urban development.												
To indicate relations between different stakeholders in the city.												
To introduce the student to the selected areas of urban development.												
Learning outcomes

**Course contents**
**1. The process of urban development**

- 1.1. Cities in a historic context
- 1.2. Process of urban growth: industrial cities
- 1.3. Process of urban growth: post-industrial cities, resilient and sustainable cities

**2. City as a system**

- 2.1. Functions of the city
- 2.2. Stakeholders in the city
- 2.3. Conflicts in the city

**3. Cities: between micro and macro levels of economics**

- 3.1. Theories of local economic development
- 3.2. Economic models of urban structure
- 3.3. Drivers of local economic performance

**4. Urban competitiveness**

- 4.1. Defining urban competitiveness
- 4.2. Quality of life
- 4.3. Workshop: Review of rankings of urban competitiveness

**5. Strategy of development - programming development of the sustainable city**

- 5.1. Strategic planning
- 5.2. Selected methods of strategic planning
- 5.3. Workshop: Review of selected strategies of development

**6. Scenarios of sustainable urban development**

- 6.1. The scenario concept
- 6.2. Scenarios in urban planning & development
- 6.3. Workshop: Evaluation of scenarios

**7. Selected urban systems: housing**

- 7.1. Real estate market
- 7.2. Housing policy
- 7.3. Housing and architectural design

**8. Selected urban systems: logistics and mobility**

- 8.1. Urban transport system
- 8.2. Urban goods mobility
- 8.3. Urban passenger mobility

**9. Selected urban systems: public utilities**

- 9.1. Water supply

- 9.2. Sewage management
- 9.3. Heating and energy

**10. Urban environmental policy**

- 10.1. Environmental impact of urban development
- 10.2. Environmental limits of growth
- 10.3. Scenarios of the environmental adjustment - workshop

**11. Urban transformations**

- 11.1. The nature of the urban space
- 11.2. The transformation processes
- 11.3. Workshop - evaluation of the selected cases on urban transformations

**12. Metropolitan areas**

- 12.1. The process of metropolisation
- 12.2. Factors determining metropolisation process
- 12.3. Workshop: evaluation of selected metropolitan areas

**13. Challenges of urbanised world**

- 13.1. Challenges facing contemporary cities
- 13.2. Models of the future city
- 13.3. International networks of cities and regions
